

### **Amendments to the Claims**

This listing of claims will replace all prior versions and listings of claims in the application:

#### **Listing of Claims:**

1. (Currently Amended) A plastisol composition comprising 5 to 60 weight % of at least one pulverulent organic polymer, 5 to 65 weight % of at least one plasticizer, 1 to 30 weight % of at least one pulverulent saccharide different from said at least one pulverulent organic polymer selected from the group consisting of monosaccharides, disaccharides and oligosaccharides, and 0.01 to 40 weight % of at least one reactive additive different from said at least one pulverulent saccharide and said at least one pulverulent organic polymer selected from the group consisting of di-~~and~~ polyisocyanates, blocked di-~~and~~ polyisocyanates, microencapsulated di-~~and~~ polyisocyanates, amino-functional additives other than condensation products of epoxy resins and polyaminoamides and/or polyamines, hydroxy-functional additives other than said at least one pulverulent saccharide, epoxy resins, condensation products of epoxy resins and polyaminoamides and/or di-~~or~~ polyamines, dicarboxylic acids, di- and tricarboxylic acid anhydrides,  $\beta$ -dicarbonyl compounds other than said dicarboxylic acids and di- and tricarboxylic acid anhydrides, metal chelates of  $\beta$ -dicarbonyl compounds, peroxides and mixtures thereof, wherein the weight % of each individual component is based on the sum total of said individual components.
2. (Original) A plastisol composition according to claim 1, wherein the at least one pulverulent organic polymer is selected from the group consisting of polyvinyl chloride, copolymers of vinyl chloride with vinyl acetate, styrene and/or alkyl (meth)acrylates, copolymers of styrene with (meth)acrylic acid, (meth)acrylamide and/or alkyl (meth)acrylates, copolymers of methyl or ethyl (meth)acrylate with C<sub>3</sub>- to C<sub>8</sub>-alkyl (meth)acrylates, alkyl (meth)acrylate homopolymers and mixtures thereof.

3. (Original) A plastisol composition according to claim 1, wherein the at least one pulverulent saccharide is selected from the group consisting of dextrose, glucose, galactose, mannose, fructose, arabinose, xylose, ribose, 2-deoxy-ribose, cellobiose, maltose (malt sugar), lactose (milk sugar), sucrose (cane sugar), gentiobiose, melibiose, trehalose, turanose, gentianose, kestose, maltotriose, melecitose, raffinose, stachyose, lychnose, secalse and mixtures thereof.
4. (Original) A plastisol composition according to claim 1, wherein the at least one pulverulent saccharide has an average particle size of 1 to 100  $\mu\text{m}$ .
5. (Original) A plastisol composition according to claim 1, additionally comprising up to 40 weight % of at least one filler.
6. (Original) A plastisol composition according to claim 1, wherein the at least one pulverulent saccharide has an average particle size of 1 to 20  $\mu\text{m}$ .
7. (Original) A plastisol composition according to claim 1 comprising 3 to 10 weight % of at least one pulverulent saccharide.
8. (Original) A plastisol composition according to claim 1, wherein said at least one pulverulent saccharide is selected from the group consisting of dextrose, sucrose, and mixtures thereof.
9. (Original) A plastisol composition according to claim 1, additionally comprising at least one additive selected from the group consisting of pigments, anti-aging agents, rheology auxiliaries, blowing agents and mixtures thereof.
10. (Original) A plastisol composition according to claim 1, wherein said at least one plasticizer is selected from the group consisting of  $\text{C}_4$ - to  $\text{C}_{16}$ -alkyl phthalates.
11. (Cancelled)
12. (Cancelled)

SN: 10/736,733

Art Unit: 1711

13. (Cancelled)

14. (Cancelled)

15. (New) A plastisol composition according to claim 1, additionally comprising hollow microbeads containing liquid blowing agent.
